

CONVERSION KIT

3/4"

Benefits

- Maximum efficiency
- Highest reliability
- Smart design
- Easy and flexible

NEW!

The R5500 saw unit with reduced RPM's, unrivaled productivity and operating economy has the flexibility to be converted into a 3/4" saw unit.

JPS 3/4"-conversion kit for R5500 saw unit with a smart design enables a unique customization to create maximum value in every situation. With a quick change of drive sprocket and bar bracket a 3/4"-bar can be mounted on the R5500 saw unit. The flexibility in the R5500 system and JPS 3/4"-conversion kit creates supreme value in the modern forestry.

The unique design provides two saw systems in one with optimal adaptation to the current challenges on site. JPS 3/4"-conversion kit is the key to be successful in modern logging.

In a nutshell, LESS IS MORE!

More effectiveness more flexibility!
