

Stump Ax

**A SUPERIOR
STUMP GRINDER**

Stump Ax

For Skid Steers and Excavators
With 30-60 GPM Hydraulic Flow

Wheel Diameter	31" (78.7 cm)
Number of Teeth	48
Hydraulic Horsepower Range	60-120 Hydraulic HP
Hydraulic Flow Range	30-60 GPM
Max PSI	5,000 PSI
Height	33.9" (86.1 cm)
Length	34.8" (88.4 cm)
Weight (Base Unit/No Mount)	891 lbs (405kg)
Weight (with Skid Loader Mount)	1,365 lbs (620kg)

SPECIFICATIONS

// Built for the Daily Grind

The Stump Ax has everything you want in a stump grinder attachment: reliability, speed, visibility and control. We gave it a heavy-duty, practical design with an industry-leading cutting wheel to help you get the job done without any downtime. It is available for skid steers, compact track loaders and excavators. And because it has the Loftness name on it, you know it's got to be good.

// STUMP AX FEATURES

Rigid Mount:

The rigid mounting style helps operators work faster than articulating stump grinder attachments do.

Angled Hitch With Forward-Reaching Boom:

This specialized design provides superior control with excellent visibility.

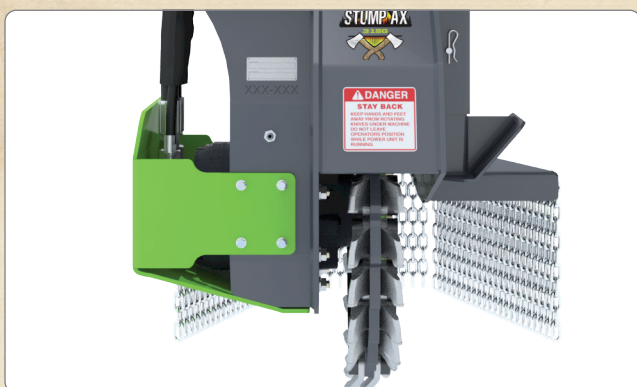

Phantom Wheel With Tomahawk Teeth:

The Phantom Wheel with Tomahawk teeth from Leonardi are highly regarded by vegetation management professionals for their high strength and fast cutting performance. The Phantom Wheel also has cut-outs to create a see-through effect for further improved visibility.

Reversible Motor Mount:

The hydraulic motor can be mounted either forward- or rear-facing. The rear-facing orientation is ideal for most applications, but can be reversed as needed when working up against buildings or other obstacles to improve clearance.

High-Torque Radial Piston Motor:

A 200cc high-torque radial piston motor on the Stump Ax is compatible with skid steers and excavators with 30- to 60-gallon-per-minute hydraulic flow ratings.

Chain Deflector:

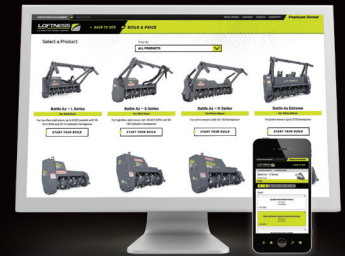

A specialized discharge with chain deflector provides superior control of the wood chips.
